

Hadi Nouredine

Software Engineer

Address: Beirut, Lebanon | Nationality: Lebanese | Phone: +96171422892

Email: hadi.nouredine.9@gmail.com | [LinkedIn](#) | [GitHub](#)

WORK EXPERIENCE

Darbuka

November 2023 – Present

Software Engineer

- Built and maintained high-scale backend services using Node.js (Express) and AWS Serverless, supporting core business workflows for thousands of users
- Designed and managed AWS infrastructure (Lambda, S3, Cognito, CloudFormation, Route 53) with a focus on scalability, security, and cost efficiency.
- Implemented Google Sign-In using AWS Cognito with OAuth 2.0 for secure authentication.
- Created a full development environment mirroring production via CloudFormation & Route 53, reducing QA issues and deployment risks.
- Automated CI/CD using CodePipeline, cutting deployment time by 60% and improving release reliability.
- Contributed to system architecture decisions emphasizing performance, serverless best practices, and fault tolerance.
- Automated recruitment and internal workflows using n8n, reducing manual review time by 40%

TecSolutions

January 2023 – October 2023

Full Stack Developer

- Built responsive frontends with Angular improving usability and engagement.
- Designed and implemented RESTful APIs using Java (Spring Boot) and Python (Django), improving backend performance, scalability, and maintainability.
- Integrated AI/NLP components using PyTorch to deliver a language translation application.
- Integrated various third-party services using Python and Node.js to support client automation and data workflows

LogicsField (CloudLinks)

August 2022 –December 2023

Software Engineer Internship

- Designed and implemented full-stack features using React.js, Angular, PHP, and Java, delivering scalable production-ready solutions.
- Applied OOP principles in PHP and Java to build modular, reusable, and maintainable code.
- Assisted in API integration and database-driven application development.

SKILLS

Technical Skills

- Backend Development:** Java (spring boot) | Node.js (Express.js) | Python (Django) | Php
- Frontend Development:** Angular | JavaScript | TypeScript | WordPress
- Database Management:** MySQL | MongoDB | PostgreSQL
- Programming Languages:** C# | Java | TypeScript | JavaScript | C
- APIs & Communication:** RESTful APIs | API Performance Optimization
- DevOps & Deployment:** AWS (Lambda, Cognito, S3, Route 53, CloudFormation, CI/CD, CodePipeline) | Docker| Git
- Version Control & Project management:** GIT, Jira
- Architecture & Methodologies:** Serverless Architecture | System Design | DevOps Practices | OOP | Agile & Scrum

Soft Skills: Problem solving | Time management | Creativity | Teamwork | Active listening | Attention to detail |

Critical thinking | Communication skills | Flexibility | Proficiency in English, both written and spoken

EDUCATION

Bachelor of Science in Computer Science

June 2022

LANGUAGES

• **Languages:** Arabic (Native), English (Fluent).

CERTIFICATIONS

- AWS Solutions Architect Associate – 08/2025**
- AWS Developer Associate – 09/2025**
- AWS Certified Cloud Practitioner – 07/2024**
- AWS Academy Graduate – Cloud Foundations 06-2023**
- Zaka AI – Machine Learning Certificate 06-2025**
